

2023 DCC events

HELP & Donor's visit

Thankfully, our donors led by HELP Cambodia paid a visit to DCC last week. We had a warm welcome to them and saw their beautiful smiles when they were provided with the souvenirs that printed our Cambodian flag. After a school welcome, students accompanied our donors to visit the community to find out new things they have not experienced especially the lifestyle of our locals living and making a business. Then they were back to school to see what improvements the students were after having missed a visit for nearly 4 years.

School Hospitality

DCC is a local community school providing free education to slum children and youth. Not only an education program, we also have a Khmer traditional dance that always performs to welcome visitors, especially donors. This class has been taught by university students every Sunday. Here are some performances on the day of donors' visit. Three dances, Blessing, Coconut Shell, and Bopha Lokey were performed. Every class from basic to pre intermediate level have to show their own talent to the donors during the significant events.

The university & senior students' presentation

On the top of the right, Udom and Songhim studied in our school since it opened. They are the first generation. Both of them graduated in different majors, Accounting and Tourism. They were on the stage to do a presentation about the way to get success of learning at university. Recently Udom and Songhim got well-paid jobs to help their families. However, after learning in the public speaking course, most of our senior students have complete confidence to do a presentation about some interesting and horrific places in our country to donors. It was amazing to hear their scripts. We really appreciated their commitment.

Future university students in early 2024

Sreynith and Sreya are our senior students. They have just passed the national high school exam this month. They volunteered as a teacher of English since they were in grade 10. Based on their sacrifice to help the new generation, They deserved to get scholarship support from HELP Cambodia to pursue an education at university. Sreynith will study accounting and her friend, Sreya is in the major of public administration.

The Graduated Students

Congratulations to our three boys, Udom, Mengtong, and Vanak even though they did not wear the graduation gowns. They all graduated this year with different majors. Udom completed in Tourism, Vanak, and Mengtong in Information Technology. Three of them are role models of the new generation. While learning at DCC, Vanak, and Mengtong used to volunteer as computer teachers. Udom was also an administrative assistant. Now they have been employed after completing their education. Thank you so much for HELP Cambodia & Sponsors to make a change in lives.
